

Dear Sirs,

Our company, **LebChem S.A.L.** is a Lebanese dealer of *raw material for the production of leather* and has business relations in several countries such as China, Nigeria, Iraq, and Syria.

Therefore, **LEBCHEM S.A.L.** would like to get a *tender offer* concerning the following raw materials:

- **Ethyl Acrylate (CAS 140-88-5)** for the order of **1,000 Tons per year** with the packing of **ISO TANKS**. (ISO TANKS contains a valve which facilitates the pumping of the chemical underground. This is necessary for technical needs regarding our storage in Italy).
- **Methyl Meta Acrylate (Methyl Acrylate) (CAS 80-62-6)** for the order of **100 Tons per year** with packing of **1000 Kg mini tank or 200 Kg drums**.
- **IPDI (Isophorone Diisocyanate) (CAS 4098-71-9)** for the order of **70 Tons per year** with the packing of **200 Kg drum**.

The above raw materials' destination is to Italy, therefore, kindly take into consideration the price as **CIF Italy and/or FOB**.

If a good offer is available, samples need to be sent to our laboratories in Italy for trial **as soon as possible**, and then an order will be **immediately** made, and thus an agreement with the company for long term and future business relationships.

We are kindly waiting for your reply,
