POLISH CHAMBER OF COMMERCE

Mr Jerzy Drożdż
Director

The Polish Chamber of Commerce is the main economic self-governing organization in the Republic of Poland.

The Polish Chamber of Commerce is composed of over 150 chambers and economic associations.

The representation of the interest of Polish enterprises vis a vis the state authorities, foreign organizations and entities is the main objective of the Polish Chamber of Commerce.

The other principal objective is the promotion of the Polish economy abroad.

The Chamber acts as an economic lobby which manages legislative, economic and financial activity in order to create the optimum conditions for the enterprises operating in Poland.

The basic goal of the Chamber is to facilitate the incorporation of the Polish economy and Polish companies into the mainstream of international cooperation.

ALUMAST S.A.

Energy Composites Sp. z o.o.

Mr Maciej Adamski
Chairman of the Board

alumast

www.alumast.eu

ALUMAST S.A. is a well-known polish producer of flagpoles and lighting columns, which in 2008 started to produce composite lighting columns made of glass fiber reinforced polymer. The technology of production was developed with Central Mining Institute and Silesian University of Technology. The production of composite lighting columns is based on the quality management system accordant with the ISO 9001:2000 standard. Our product gained Declaration of Conformity (CE) with European norm PN-EN 40-7:2004. Composite lighting columns produced by ALUMAST are ideal for use in road and railway sector. The advantages of composite columns have been noticed by the Railways and can be used there. Columns have a degree of protection IP44 and IK10. Our lighting columns are also exported to many countries.

Energy Composites belongs to a corporate group of Alumast S.A. and is also located in Wodzisław Śląski in Poland. The company was established in 2014 and produces composite products for the energy sector.

EC offers composite transmission poles, box trusses and 9m modular service transmission poles. They are lightweight, extremely durable and have no scrap value. What is more, glass fiber reinforced composite is an insulator. Due to the fact that composite poles are ultra-lightweight, there is no need for heavy building equipment.

SWE Sp. z o.o. is another company which belongs to the corporate group of Alumast S.A. SWE (Sun Wind Energy) is an engineering company focused on renewable energy sources. The company focuses on photovoltaic and wind energy. SWE is an official distributor of inverters produced by company SolarMax.

Some of our business partners: Vattenfall, Skanska, Shell, IKEA, Elektroskandia, Volvo, PKP Energetyka, PKP Polskie Linie Kolejowe (Polish National Rail Operator), PGE, Tauron Dystrybucja, Eurovia Vinci, PKN Orlen.

EKOL LOGISTICS Co. Ltd

Mr Wojciech Brzuska

Ekol Group

Ekol Logistics is a logistics operator which began its operations in 1990. The mother company is located in Turkey where it is the market leader.

Ekol is listed among the pioneering suppliers of integrated logistics services in Turkey and Europe with its distribution centers with more than 750,000 m² indoor areas in Turkey, Germany, Italy, Greece, France, Ukraine, Bosnia-Herzegovina, Romania, Hungary, Spain, Czech, Bulgaria and Poland, and more than 6,500 multinational staff. In the next few months Ekol will keep the pace of its growth in Slovakia and Iran.

Ekol offers: transportation, warehouse management, foreign trade and supply chain management solutions.

Ekol is the owner of 5 Ro-Ro vessels and 5,000 transport means. The company has a network of rail connection in Europe as well. Ekol specializes in intermodal transport. Thanks to it, Ekol can offer intermodal solutions that offer a lot of benefits such as environmental benefits, financial, social (for drivers) and operational as well. Thanks to the intermodal solution Ekol saves 230,000 trees every month.

Ekol has achieved sustainable growth as the turnover has been increasing by an average of 25% annually for the last 5 years.

EMIT S.A.

Mr Adam Bron
Deputy Sales Director

EMIT, since established in 1921, has been the leading manufacturer of electric rotating machines on Polish and foreign market.

The company has long standing experience in producing items of equipment for clients who apply electric motors and generators.

Thanks to long tradition, capability and use of modern technologies EMIT offers reliable, safe, eco-friendly and durable products.

EMIT S.A. basic production programme consists of over 2500 types of electric machines.

Induction motors (slip-ring and squirrel-cage), rated output from 50 kW to 5000 kW, to be further divided:

- High Voltage motors (10-11 kV), output from 200 kW to 4000 kW
- Medium Voltage motors (from 3 to 6 kV), output from 160 kW to 5000 kW
- Low Voltage motors (up to 1000 V), output from 160 kW to 2250 kW
- Low and High Voltage Slip-ring motors, output from 90kW to 2100kW
- Explosion-proof and Flame-proof High, Medium and Low Voltage motors - Traction motors (low and medium voltage), output from 50 kW to 1500kW, and traction generators for various traction vehicles:
- Trolley-buses
- Trams (also low-floor trams)
- Subway cars
- Electric Multiple Units
- Locomotives (diesel and electric).

LAKFAM Co.

Mr Jerzy Zakrzewski
Owner

Mr Mariusz Jędrzejewski
Manager

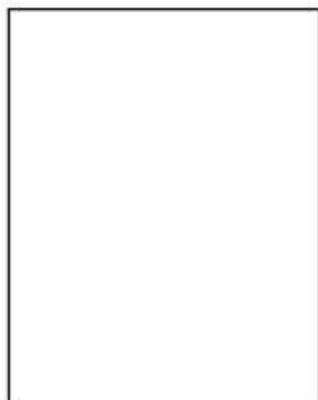

Company Lakfam Sp. J. is a leading manufacturer of grinding machines for sharpening a wide variety of tools like: circular saws, milling cutters (straight, helix line, wedge connectors), planing heads, knives and Universal grinding machines type NUA-25 used in production companies.

Company Lakfam also specializes in steel constructions for Energy, oil and gas industry, halls and transport infrastructure.

We fulfill the requirements of international norms of quality.

LOTOS S.A.

Mr Cezary Krasodomski
Secretary of the Supervisory Board

LOTOS is vertically integrated oil entity focused on crude oil exploration and production, petroleum processing as well as commodities sales. It has above 30% stake in domestic wholesale fuel market. Moreover LOTOS holds strong position in lubes, greases and bitumen sales in Poland. Since June the 9th 2005 Grupa LOTOS S.A. is listed on Warsaw Stock Exchange.

LOTOS operates state-of-the-art refinery (located in Gdańsk), holding a suitable connection to "Druzhba" pipeline and Naftoport - Baltic Sea terminal network. In 2011, using hi-tech solutions e.g. Best Available Techniques (BAT), LOTOS finished comprehensive upgrade investment project (Programme 10+), which main goal was to boost refining capacity to 10.5 mtpa. Programme 10+ fruition was estimated on 1,5 billion Euro. Due to Programme 10+ LOTOS is able to enhance Polish, NWE and CEE energy security policy, especially in the range of stable fuel supplies.

On the upstream side LOTOS is present on the Baltic Sea, Norwegian Continental Shelf and onshore in Lithuania.

All abovementioned key goals constitutes of pursuing innovative growth in the areas of crude exploration and production, petroleum processing as well as sales and trading of products meeting the most stringent quality standards, in a manner that is environmentally friendly, compliant with the energy security policy, guarantees full satisfaction of customers and ensures the ongoing development of employees and shareholders interest.

LUBAWA S.A.

Mr Arkadiusz Janicki
Sales Director Lubawa S.A.

Mr Dariusz Kaszkowiak
Sales Director Lubawa Group

The security of the Clients of Lubawa S.A. is a challenge. Meeting this challenge is the mission of the company. Lubawa's offer includes over 500 products which enables the company to fulfill orders for various types of the uniformed services: army, police, municipal police, border patrol, fire brigade and special forces. Lubawa S.A. is a significant and active market participant, also in the field of the protection of workers. The company's high potential, strong market position and extensive experience in well-established areas enable the company to take up challenges in new areas of business. Lubawa S.A. employs more than 200 people, executes contracts over a dozen millions, mainly for the Polish army and police. We cooperate with many business partners from whole Europe and also from Armenia, Jordan, Liban, Iraq, Nigeria and Ukraine.

Our Thanks to the scientific and research institutions from Poland and abroad, the company is able to provide innovative products of the highest quality. Lubawa S.A. confirmed its experience with NATO certificates, standards of quality management, production control systems and qualified trading. Thanks to innovative technologies and individual approach to orders, the company is able to prepare each product and meet the expectations of the services responsible for the security of a country and its citizens. We wish to utilise our pooled experience and expertise so that all our actions promote the growth and success of our clients, employees and the company.

Through continuous improvement and updating the systems as well as the development of innovative technical solutions offered by Lubawa S.A., we are able to increase the safety of users of our products.

METALWELD FIPROM POLSKA Co. Ltd

METALWELD

Mr Michał Kalinowski
Sales and Marketing Director

Metalweld was established in Poland in 1993 as the independent producer of the welding consumables. Our over twenty years old production experience allows us to meet individual needs and expectations of the most demanding clients, representing many industries and applications.

Metalweld has been operating both domestically and abroad, esp. in Europe, Middle East and Africa. We produce and supply the electrodes MMA, MIG wires, TIG rods, flux cored wires, subarc SAW wires for the grades as follows:

- MILD AND CONSTRUCTION STEELS
- HIGH TENSILE STRENGTH STEELS
- CREEP RESISTANT STEELS (power generation industry)
- STAINLESS and HEAT RESISTANT STEELS
- NICKEL BASED ALLOYS
- HARDFACING (general purpose, high abrasion resistant, high temperature and abrasion resistant, tool steels, martensitic alloys)
- COBALT BASED ALLOYS
- CAST IRON
- CUTTING & GOUGING

We develop all the time our product range in order to deliver the best product is possible for the market. The quality of METATWELD's welding materials is approved by many classification societies like LR, BV, DNV, GL, ABS, TÜV, DB, RMRS and local UDT.

Our company has been implemented with Quality Assurance System EN ISO 9001 and 14001.

Thanks to our knowledge, we can deliver fully customized solution regarding the technology and packing. Most of our products are fully VACUUM packed. We are sure that our products will meet your requirements concerning quality, packing standard, time of delivery and prices.

We would like to invite you to the cooperation with our company as a relevant business partner on the field of the welding consumables.

Middle East

Industrial installations and devices

The Service - Production - Commercial Enterprise NIWA J.J. Niwa Sp.j. specializes mainly in performance of technological installations as well as tanks and devices for chemical, petrochemical, food, energy and timber industry as well as in environmental protection sector.

The scope of production includes:

- technological installations: pipelines, spools.
- pressure and non-pressurized vessels, - storage tanks, - technological equipment, i.e.: heat exchangers, reactors, flashboxes, columns.
- welding structures: pipe bridges, platforms according to PN-N 1090.

NIWA J.J.

Our characteristic feature is an excellent knowledge of the investment market, the quality and punctuality of realized investments.

We have implemented the integrated quality management system according to PN-EN ISO 9001, PN-EN ISO 14001 and PN-N 18001/OHSAS certified by UDT-Cert as well as welding quality assurance system PN-EN ISO 3834-2.

Our certificates and qualifications prove that we always meet our Clients' requirements regarding production and confirm the high quality of company services.

We are looking for Iranian business partners interested in our performance of technological installations in Iran following up-to-date technologies, especially in oil industry, as well as Iranian companies interested in pressure and non-pressurized stainless and carbon steel tanks.

ORLEN OIL Co. Ltd

Mr Tomasz Sitko
Area Sales Manager

ORLEN OIL is a leader on the lubricants market in Central and Eastern Europe. The company is a part of the Capital Group of Polski Koncern Naftowy ORLEN S.A., one of the largest oil industry corporations in the region. ORLEN OIL is rapidly expanding its sales network on the European markets for base oils and ready-to-use lubricants. The company is present on over 40 international markets.

Systematically developed portfolio of specialist products is able to meet the needs of customers from every sector of industrial production, beginning with automotive industry, truck and bus engine oils, agriculture, forestry and horticultural oils, oils for construction machinery and heavy equipment, and ending with industrial oils.

Our own research and production facilities guarantee the ability to create solutions tailored to customer needs.

One of the key objectives of a leader in lubricant production is to develop robust and efficient distribution channels in order to enable widespread availability of its products on the market. In pursuit of this strategy, ORLEN OIL's distribution network covers almost whole Europe and is expanding wider. In addition it performs a vital role in executing commercial and marketing policy. The company's customers have the opportunity to be a part of a comprehensive technical and marketing support programme.

PMPoland S.A.

pmp

Mr Przemysław Klimczak
Vice President, Business Development
& Marketing

PMP (Paper Machinery Producer) - a global provider of tissue, paper & board technology, has been supporting pulp and paper industry for over 160 years. Company with headquarters in Jelenia Góra, Poland, owns 6 facilities in 4 countries (Poland, USA, China, Italy). The company has built its identity over the years under the names H.Füllner, Fampa, Beloit Corporation and, since 2000, PMP Group. PMP is a medium size Polish-American Corporation (privately owned) offering high quality products and services. PMP guarantees flexible project execution and constant focus on partnership and win-win solutions. It is a global player, with a yearly turnover of 48 million EUR (in 2015), employing people in Poland, China, United States and Italy (over 650). Within the last five years PMP reported a sales increase of 20%.

PMP is present all over the world, however, most of our references can be found in North America (USA, Canada), Asia (China, Indonesia, Taiwan, India), and Europe (Russia, Germany, Poland, Czech Republic, Ukraine, France, UK). Within the last fifteen years, PMP has supplied over 262 projects (new machines and rebuilds) in 33 countries for 113 customers. PMP is a recognized international player in the paper industry providing rebuilds of existing lines (applying core sections like premium Intelli-Jet V® hydraulic headboxes, Intelli-Top® formers, Intelli-Nip® extended nip presses, Intelli-Sizer™ metering size presses, and Intelli-Reel® from our Intelli-Paper® platform) and complete tissue machines (Intelli-Tissue® platform). The list of PMP references around the world covers corporate partners like P&G, Smurfit Kappa, Mondi, APP, YFY, as well as independent players, creating a solid base for organic growth.

Potential interest: deliveries of new tissue/paper machines, tissue/paper rebuilds, engineering services, optimization services.

Potential partners: Pulp & Paper Industry: tissue mills, paper mills, tissue converters.

ROZTOCZE Roman Rak

Mr Roman Rak
Owner

WSK-Tomaszów Lubelski Sp. z o.o. (Ltd) company was founded in 1969 and now has more than 46 years of valuable experience. It specializes in precise metal processing on modern CNC machines mainly for aviation, food, pharmaceutical / medical and machine industry. Company is well-known and approved manufacturer which specializes in advanced production of complex and accurate components for aerospace industry. WSK TL is highly skilled, well equipped and certified supplier of Finmeccanica /AgustaWestland, Pratt&Whitney/UTC, Liebherr and other worldwide aerospace corporations. Most of manufactured parts are directly responsible for the safety of the flight. Current employment is about 200 people. Company is owned by Mr Roman Rak.

Company ZUP Roztocze RST Roman Rak is the biggest polish producer of industrial locking systems, locks, hinges and accessories for: energetics, telecommunication, transportation, HVAC and machine industry. The company provide such technologies like: CNC machining, sheet metal processing, zinc die-casting, plastic injection, professional welding, powder painting and galvanizing (zinc, nickel plating). It also owns a tool shop where it can provide moulds and tools for its needs but also for external customers. This year the company ZUP Roztocze Roman Rak will celebrate the 25th anniversary of its founding. It started from one person - Mr. Rak (founder and owner) and now it employs about 500 people.

Companies WSK-Tomaszów Lubelski Sp. z o.o. and ZUP Roztocze RST Roman Rak are two separate companies, but, owned by one man - Mr. Roman Rak. They are located in Tomaszów Lubelski - Poland. They are located in one place and can share production area, technologies, know-how and experience of engineers from both companies.

Turnover of both companies is more than 20 mln EUR. Total production area is about 15 000 sqm. Machine Park include over 350 machines, of which over 120 are modern CNC machines.

Both companies can provide goods and services in very high quality, which can be confirmed by ISO certificates: ISO 9001:2008, PN-EN ISO 3834-2:2007, EN15085-2:2007, EN 9100:2009, AS 9100 REV C, and other.

TORPOL OIL & GAS Co. Ltd

Mr Cezary Pokrzywniak
President of the Board

Mr Adam Siwek
Director for Strategy and
Development

Torpol Oil & Gas provides complete packages for oil and gas processing plants or individual equipment of any size or configuration. We supply all engineering and project management services using professionally trained engineering personnel. Torpol Oil & Gas has significant knowledge in the field of oil and gas installations and implements only the latest and energy-saving technologies.

The knowledge and experience of our engineers has granted us a leading position in quality and reliability for small and medium packages in oil & gas sectors.

Torpol Oil & Gas prepares feasibility studies, process calculations, and engineering designs; takes care of procurement and fabrication, assembly, carries out supervision of pre-commissioning, commissioning and start-up of facilities.

In the oil and gas sector we design and supply the following complete packages: Glycol Gas Dehydration Units, Amine Gas Sweetening Units, Mole Sieve Units, Separation Units, Stabilization Units, Fractionation Units, Desalter Units, Propane Refrigeration Units, Low Temp Separation Units, Compressor Units, Adsorption Units, Filtration Units, Flow Metering Units, Blending Gas Stations, Fuel Gas Stations, Chemical Injection Packages, Instrument Gas Dryer Packages.

Polish Companies in the Oil, Gas, Refining and Petrochemical Exhibition

5 - 8 May 2016

Exalo Drilling SA maintains a fleet comprising more than 50 drilling and workover rigs of varying power, used to drill wells and perform all kinds of downhole work, as well as a wide range of tools and equipment to perform oilfield services including treatments for the intensification of production and repair of the existing holes.

In addition, Exalo offers drilling of geothermal wells for drinking water and for the Underground Gas Storage.

The Company works for the recognised oil & gas upstream investors, both in Poland and abroad, making Exalo the leader in Central and Eastern Europe.

We have also established a foothold in selected markets across Europe, Asia and Africa, including major hydrocarbon production markets, such as Kazakhstan.

We operate foreign branches, which brings us closer to our customers and allows us to respond faster to their needs. At present, we provide our services to several dozen companies from a dozen or so countries, including a number of international leaders of the exploration & production industry.

We are interested in cooperation with the National Iranian Oil Company and its subsidiaries.

Geofizyka Kraków S.A. established in 1956 is a seismic contractor and active on many markets in Europe, Asia and Africa.

We offer a wide range of services helping our clients to explore natural resources in reservoirs.

Our offer includes but not limited to: project design, seismic survey, data processing and data interpretation, full field study, MDP etc.

As our standard we deliver to the clients satisfaction and good quality data.

Polish Oil and Gas Company (PGNiG) is a leader of the natural gas market in Poland. PGNiG SA is listed on the Warsaw Stock Exchange as part of WIG 20, the index of the largest Polish companies.

The company's core business includes exploration and production of natural gas and crude oil fields and, through its key subsidiaries, import, storage, sale and distribution of gaseous and liquid fuels, as well as generation of heat and electricity.

PGNiG SA has a stake in approximately 30 companies, including entities providing professional geophysical, drilling and maintenance services, highly esteemed on international markets.

PGNiG SA has branches in Russia, Belgium, Pakistan, Belarus, and Ukraine.

Meetings with representatives of companies associated with the sector upstream Oil & Gas.

POLISH CHAMBER OF COMMERCE

Foreign Relations Department

Mrs Maria Nowakowska
Regional Director

Foreign Relations Department of the Polish Chamber of Commerce conducts activity related to internationalisation of Polish enterprises and promotion of Polish export.

Agreements concluded with partner organizations abroad and contacts with numerous international business organizations allow us to provide active support for Polish enterprises by offering them various forms of promotion and finding foreign partners.

The main duties of the Foreign Relations Department include:

- Organization of Polish trade missions abroad and in cooperation with foreign trade missions organizers planning and arranging their visits to Poland.
- Arranging participation of Poland enterprises in international fairs and exhibitions abroad.
- Providing information and training to Polish companies.
- Organization of international seminars and conferences on development of the Polish economy and foreign trade relations.

The Foreign Relations Department cooperates with bilateral organizations and commercial chambers in the area of promotional activity on individual markets.
